Dogs & Cats FREE VACCINES for Life Program

 Vaccines for Dogs:
DA2PP, 4-way Leptospirosis,
Bordetella, Rabies.

 Vaccines for Cats: FVRCP,
Feline Leukemia, Rabies,
including FeLV/FIV test prior
to initial vaccines.

 Vaccines are only given to a
healthy pet examined by the
veterinarian prior to vac-
cination. You pay only for the
office visit that includes the
physical exam, the vaccines
are FREE of charge.

 Microchip is required for pets
on this plan and is FREE of
charge.

 Enroll with an only one time
fee of \$99 for the lifetime of
the pet!

The most important part of the relationship between you, your pet and your veterinarian is a complete physical exam of your pet at least annually. While vaccines play a vital role in preventing diseases, just getting vaccines is not enough to ensure the longest, healthiest life for your family dog or cat. We encourage every pet owner to have his or her pet examined at least once a year by the veterinarian if younger than 7 years of age and twice a year if older than 7 years of age. In order for you to be able to accomplish both in an economical and convenient way, the important physical exam of your pet and the necessary vaccines, we are pioneering a new "Vaccines for Life Program" that emphasizes the importance of the physical exam.

Once your pet is enrolled, we commit to administering vaccines at no additional charge for the pet's lifetime. A Monrovia Animal Medical Center veterinarian will discuss the life style of your pet and any existing problems with you, perform a thorough physical examination, and inform you of any important findings. Using this information, the veterinarian will determine which vaccinations are needed and the vaccination schedule best suited to your pet. Not all available vaccines are needed or required every year. Vaccines offered for dogs include: Adenovirus 2, Bordetella, Distemper, Leptospirosis, Parainfluenza, Parvovirus and

Rabies. Vaccines offered for cats include: Calicivirus, Feline Leukemia, Rabies, Rhinotracheitis, and Panleukopenia. For cats, we also perform the Feline Leukemia and Feline Immunodeficiency Virus tests prior to the initial vaccinations at no additional charge.

The Standard of Care in veterinary medicine requires a veterinarian to acquire a health history and to perform a physical exam prior to and every time a vaccine or vaccines are administered. This is essential to make absolutely sure that your pet is healthy before a vaccine is administered. We care to do it right, and this is the basic medical standard. Your pet's health is our number one concern!

Your pet must have a microchip for identification purposes on this plan. If your pet needs a microchip, it will be included, with lifetime registration with the AKC CAR (American Kennel Club Companion Animal Recovery).

The Free Vaccines for Life Program is activated the moment the contract is signed and the enrollment fee of \$99 is paid.
